Projects

Expense Tracker App
This web-based application helps you control your daily expenses. All you need to do is to add the description and transaction amount. When you add positive transaction amount, it will add up in your income and when you insert the negative transaction amount, the amount will be subtracted from your added income.

Portfolio Website
It is a simple Portfolio website made on HTML5, CSS3 and JavaScript using bootstrap. It contains different sections, and each section contains different parts. It covers my education, experience, portfolio and many more.
